Exercise 4b – Task Analysis for an app using DIA

AIM:

To design a flowchart using Dia that represents the navigation flow of a food delivery application, including browsing, cart management, login, checkout, payment, and order completion.

TOOLS USED:

● Dia Diagram Editor – Dia Official Website

●Basic UI/UX Design

PROCEDURE: App Flowchart

Step 1: Planning the Flowchart

- Identified main stages:

  Login/Register, Checkout, Payment, and Order Confirmation

- Organized them in a logical sequence

Step 2: Creating the Diagram

- Opened Dia and created a new diagram
- Selected appropriate flowchart symbols

Step 3: Designing Components

1. Start & Home Screen

- Added Start symbol → Home Screen
- Connected to Categories and Search

2. Product Selection

- Product Details → Select Item
- Connected to Add to Cart

3. Login / Register

- User Login or Registration
- Proceeds to Checkout

4. Checkout Process

- Enter Delivery Address
- Confirm Order Details

5. Payment Flow

- Select Payment Method → Process Payment
- Payment Success → Order Confirmed
- Payment Failure → Retry or Exit

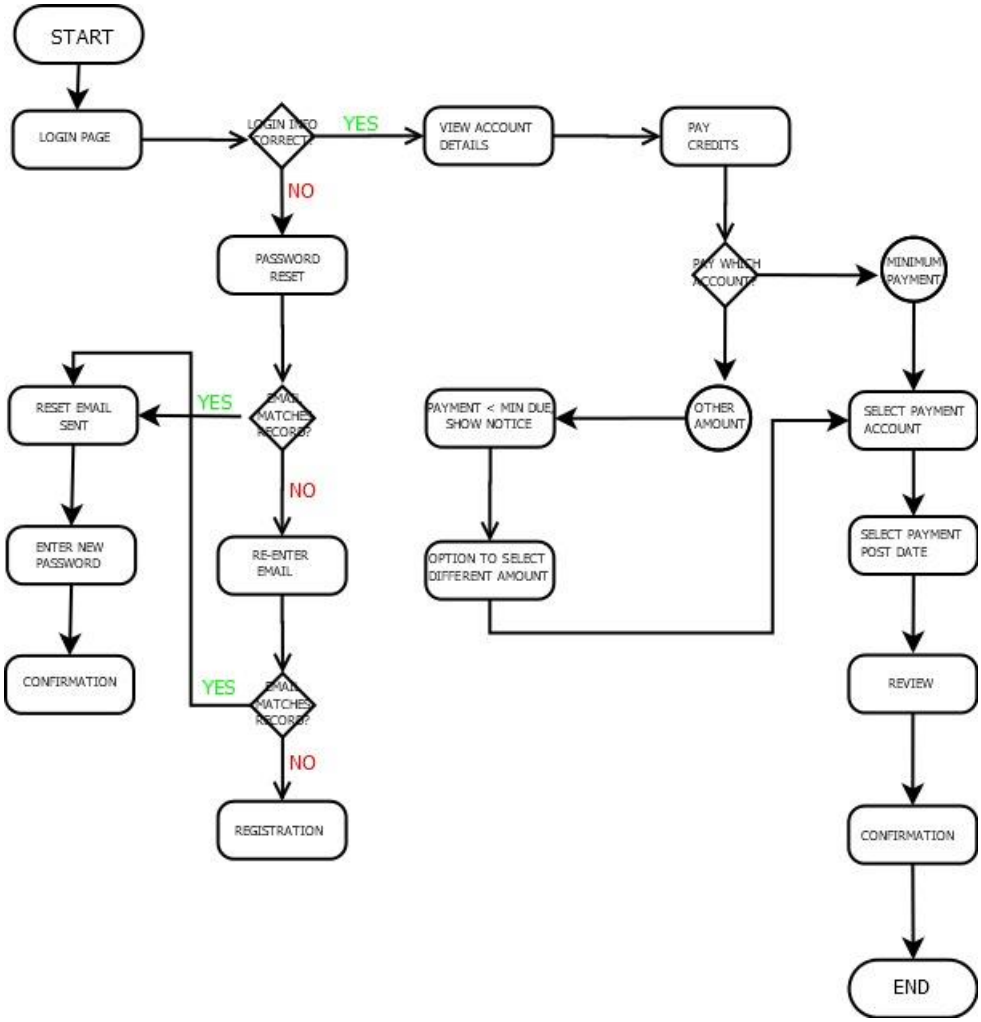
6. Order Completion

- Order Confirmed → End (Order Placed)
- Optional: Track Order

Step 4: Linking the Flowchart

- Connected all steps using arrows:
  Home → Browse → Checkout → Payment → Order Completion
- Ensured smooth navigation

FLOWCHART DESIGN:



RESULT:

A flowchart was successfully created using Dia that clearly represents the complete workflow of an application, from browsing items to order completion.
